📚 stackoverflow

Full-stack Web2 and Web3 Software Engineer with 4 years of experience working with different kinds of web technologies. Skilled in solving problems with Google Cloud, HTML5, CSS3, JavaScript, Python, TypeScript, React, Solidity, Metamask, Ethereum, Ethers, Hardhat, Openzeppelin, React Native, Redux, SQL, MySQL, and NodeJs. Focused on being a valuable part of any team I am on and believe in the team rising together. If one portion of the team needs help with a task, I have no issue jumping in to assist with anything required.

Work Experience

The Bulb Africa, Lagos Nigeria
Software Engineer
(April 10, 2021 - Present)

I worked on a whole project from design to development as a Frontend Engineer in a team of seven members. In our development, my tasks were: ● Developing user-friendly web pages with HTML/CSS, JavaScript, Material UI, and React hooks. ● Testing the Frontend using react testing library and mocking some functionalities for easy testing. ● Creating API design and efficient database queries for better performance with technologies such as Node.js, Express.js, and MySQL. ● Testing all endpoints using Postman to ensure all endpoints are free of bugs. ● Implementing authentication and authorization using JWT and react-router. ● Creating three branches from the master branch for better collaboration and pushing code daily into the company repo.

Colab Tech, Kaduna Nigeria
Frontend
(January 02, 2019 - March 27, 2021)

I worked on a whole project from design to development as a Frontend Engineer in a team of five members. In our development, my tasks were: ● Developing user-friendly web pages with HTML/CSS, JavaScript, Material UI, and React hooks. ● Developing a fully responsive design of the Frontend to ensure its accessibility on all devices. ● Implementing authentication and authorization using JWT and react-router. ● Testing the Frontend using react testing library and mocking some functionalities for easy testing.
